

UKChitChat-mIRC Help

This helpfile is designed to help you download and set up the pre-configured mirc for the UKChitChat-irc server.

The custom mirc can be downloaded from <http://www.wkdfm.co.uk>

WKDfm
Curent DJ DJ Abbott WKDfm Playing: Olivia Newton-John - You Ain't Got The Right

Home | DJs | Chatters | Schedule | About Us | Contact | News

We are a live internet radio station. Some of our shows may contain adult themes.

To put it bluntly, we are a group of friends who love music and enjoy playing what we love, to those who want to hear it. We are not trying to be a main-stream radio, there are enough of them as it is. We don't care about polished performances and gilding the Lilly, we just love what we do and we love doing it for you, we are the stars of internet radio because we are different and that's what makes us so popular. Our chat channel is 18+ but there are other channels on the server. To join us on chat the server details are chat.ukchitchat-irc.co.uk Port 6667 channel #WKDfm See you there :) The chat server is open 24/7.

For help with the chat server mIRC

mIRC can be obtained from <http://files.ukchitchat-irc.co.uk/mirc.zip>

For help setting up our mIRC - mIRC Setup Help (PDF 2.76Mb)

Once you have downloaded the zipfile, navigate to your download folder (or wherever you downloaded the file to). Windows explorer will open the zipfile but does NOT extract the files unless you tell it to. This has caused confusion when some people have opened it this way and found it does not work properly. Instead, right-click on the zipfile and choose "Extract All..." (fig.3)

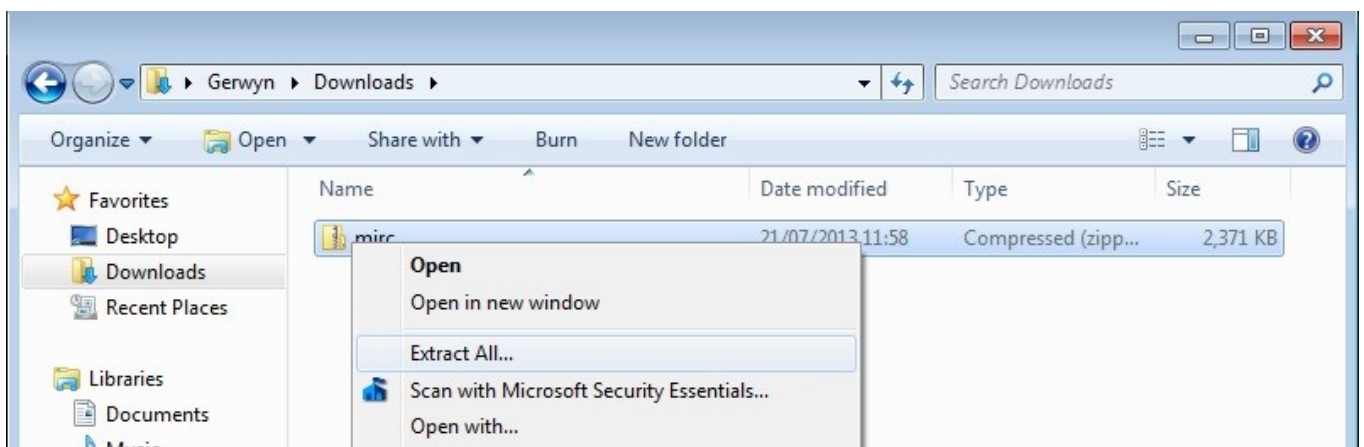

fig.3

Choose where to extract the contents, I would suggest your documents folder. Then click ok (fig.4) and click on extract (fig.5)

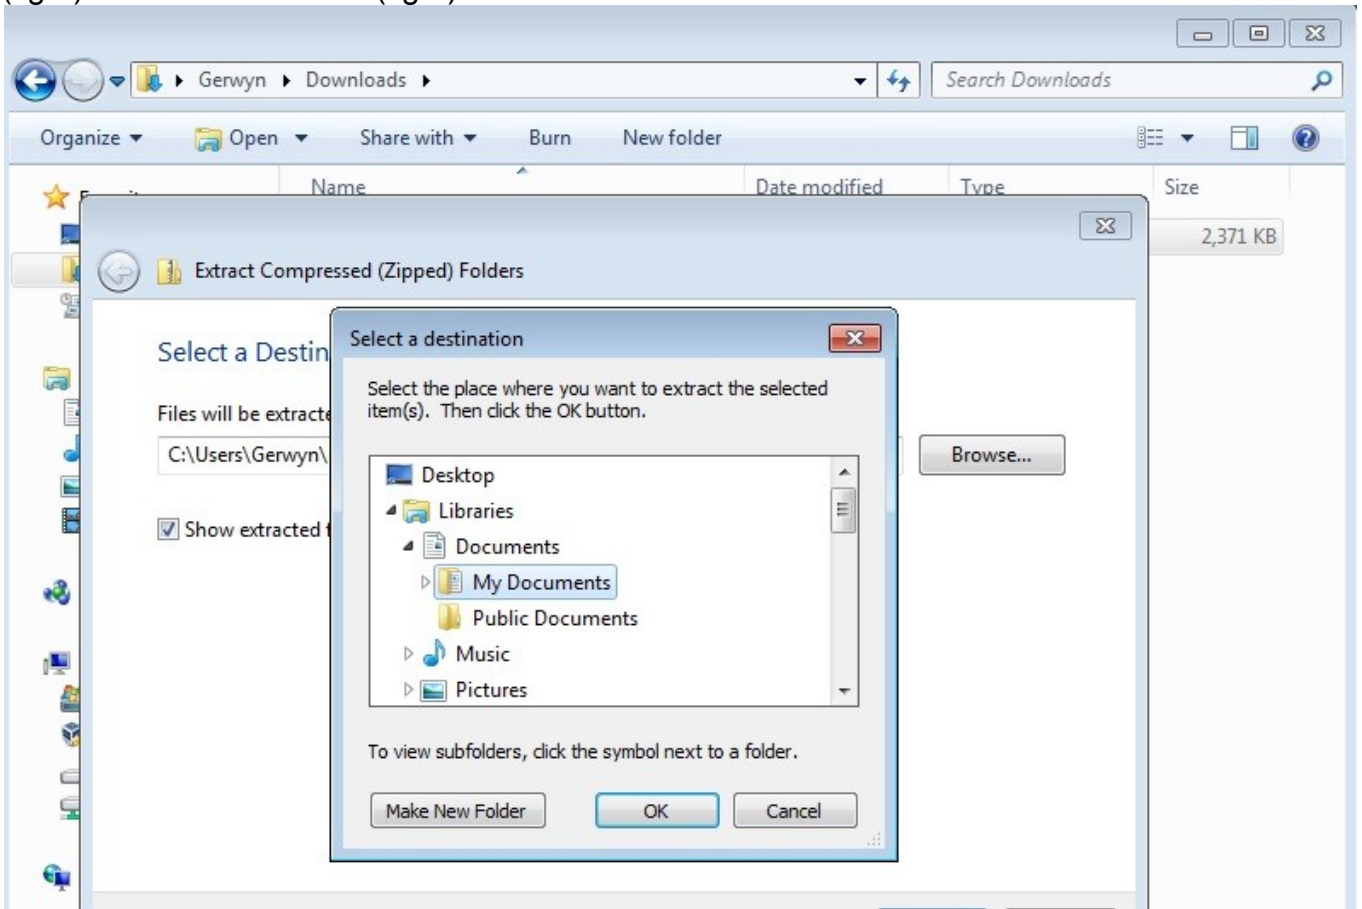

fig.4

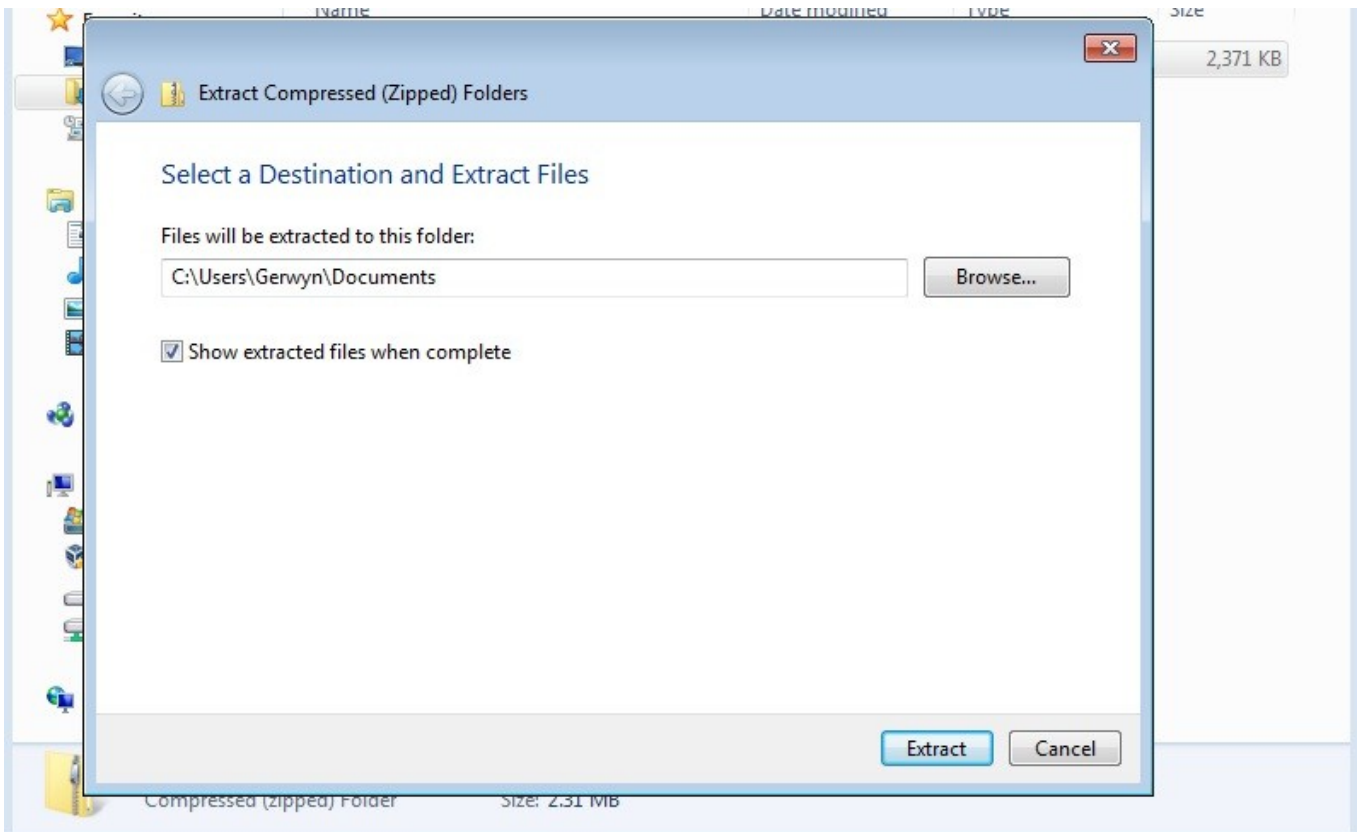

fig.5

You should now find a folder called UKChitChat-Mirc in your documents folder (fig.6). Double-click on this folder to open it.

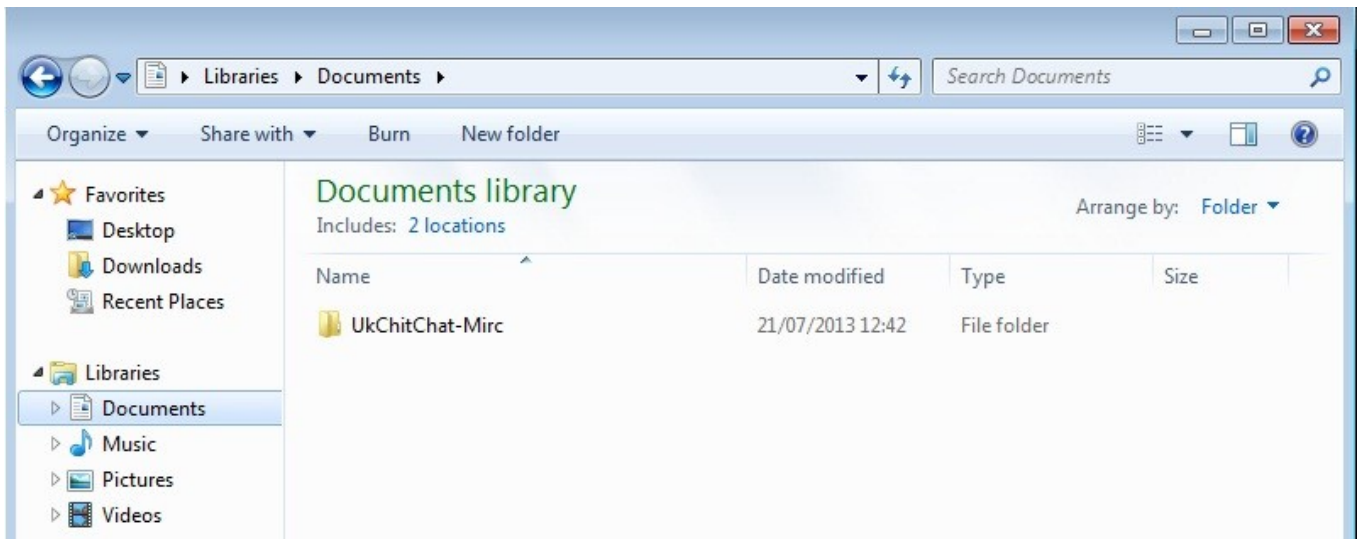

fig.6

Now, find the mirc application (fig.7), right-click on this and select “Send to” and then Desktop (create shortcut). Once you have done this, close windows explorer and you should find a shortcut on your desktop (fig.8)

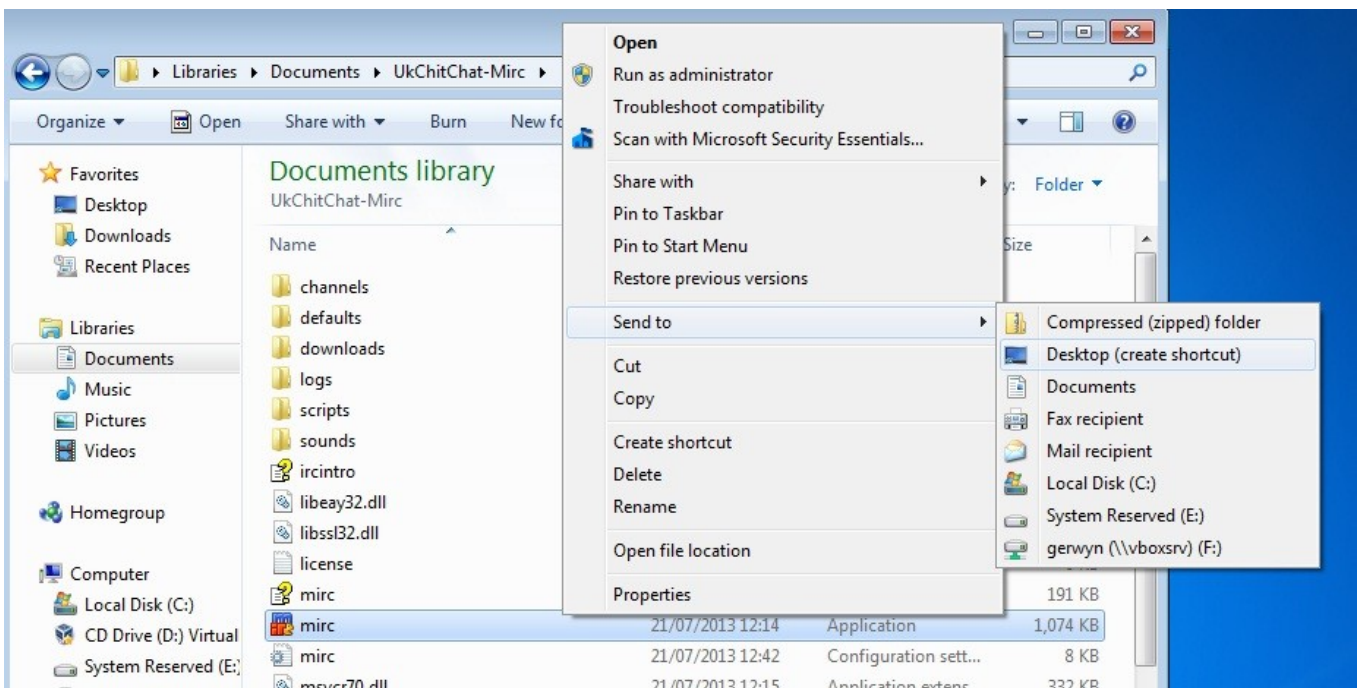

fig.7

So from now on mirc can be started from the desktop, saves having to go into the mirc folder each time

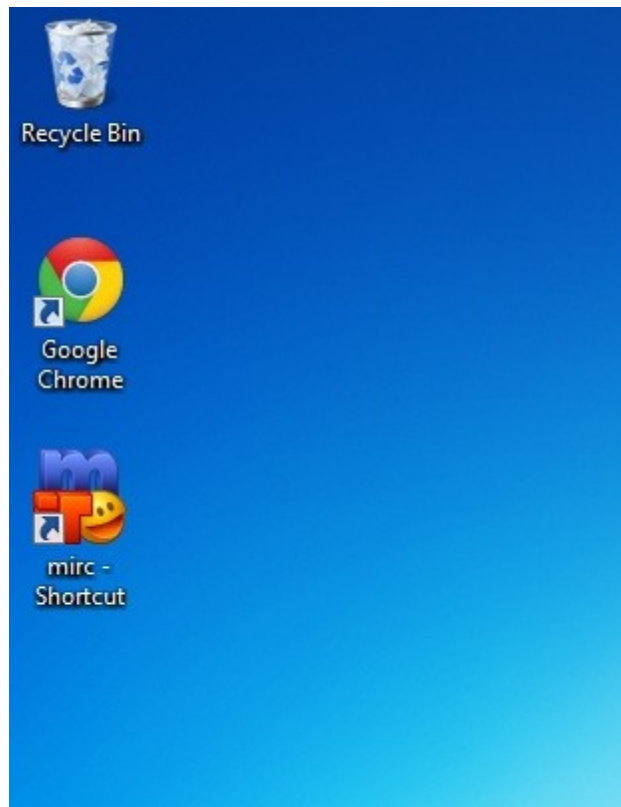

fig.8

Double-click on the shortcut to start mirc. You may get a warning pop up when you start mirc for the first time, simply untick the box (fig.9) “Always ask before opening this file” and click on run.

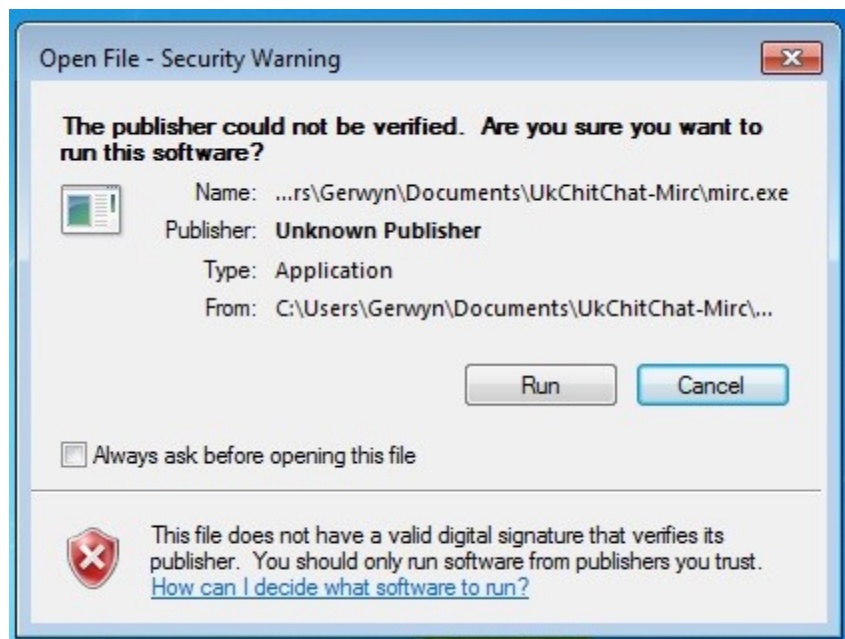

fig.9

Once started you should see fig.10

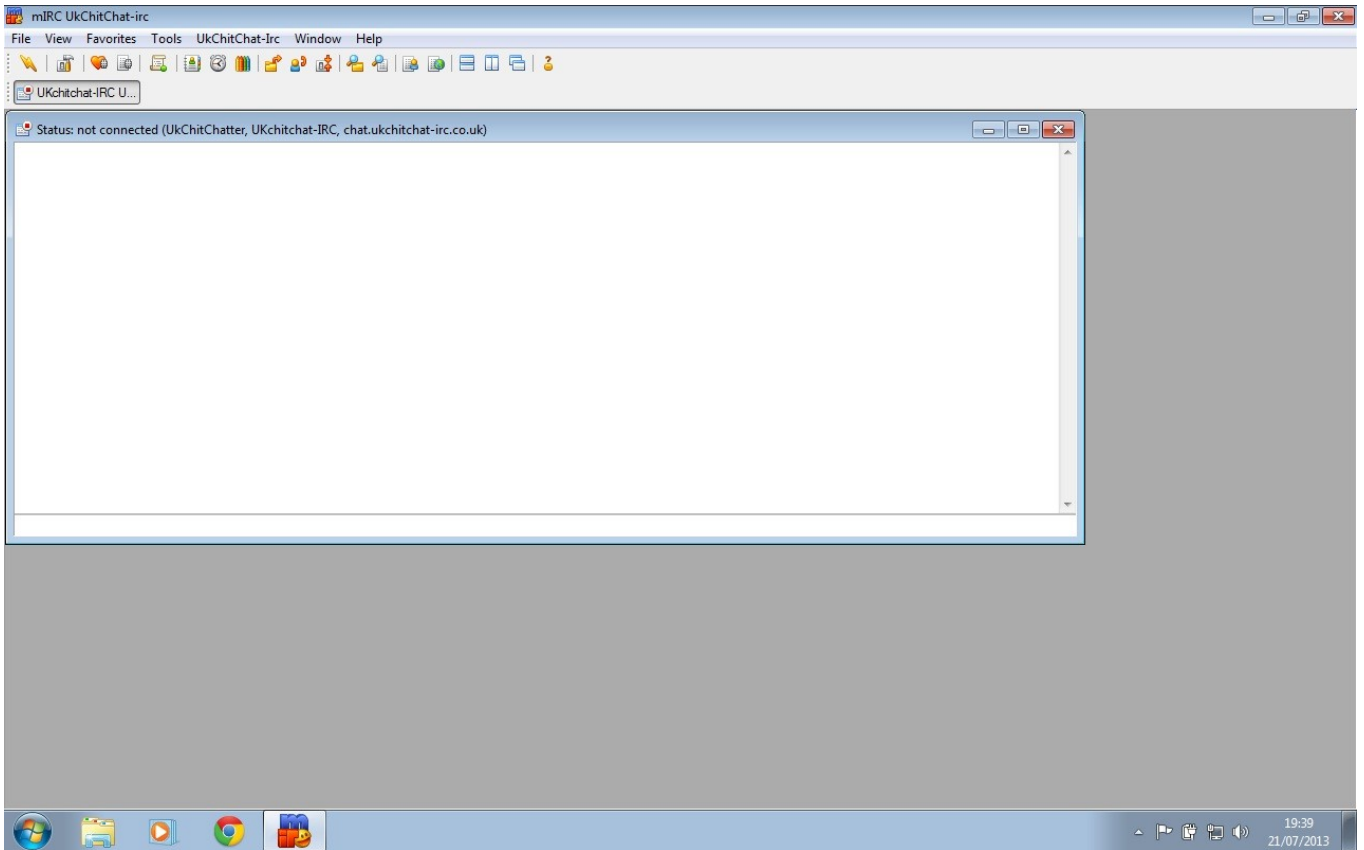

fig.10

Now if you have come from webchat you may have already registered your nick, if so click on the icon with the hammer on it. This will open the options dialog. Click on connect as in (fig.11)

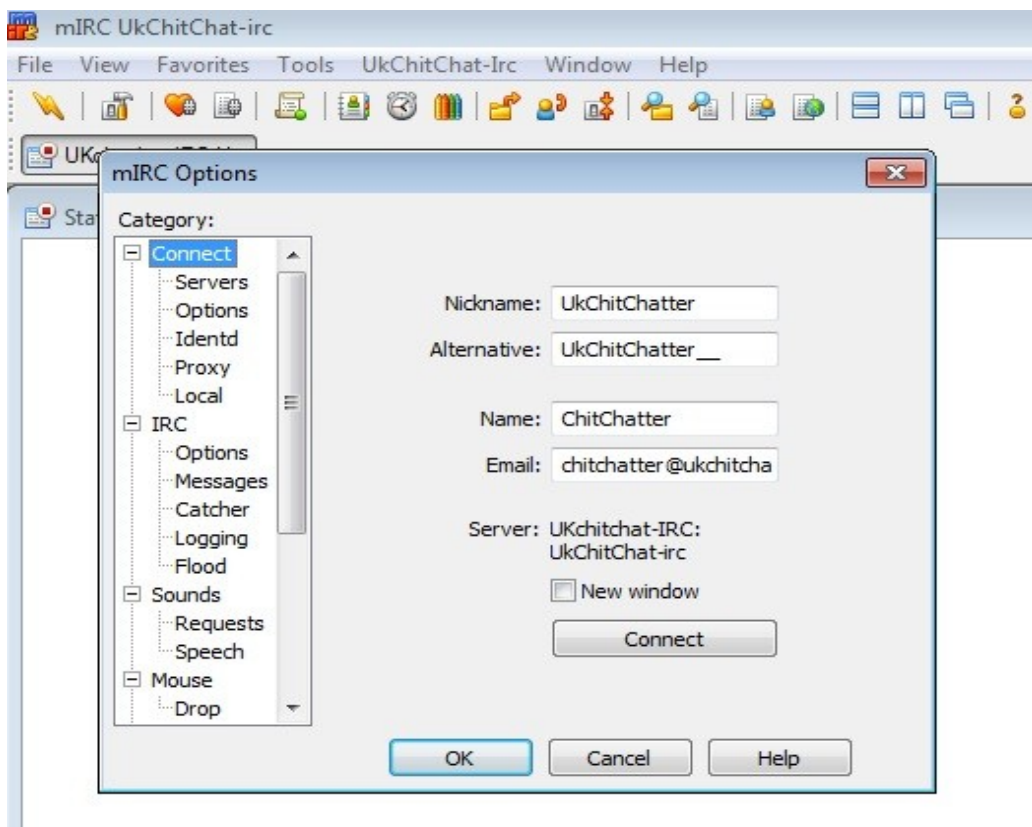

fig.11

Now in the Nickname box delete what is there and type in your registered nick. Also replace whats in the Alternative box. Most people just type in their nick with either a number or underscores. Once done, click on the Options just under Connect and you should see (fig.12). Click on the Perform button on the right.

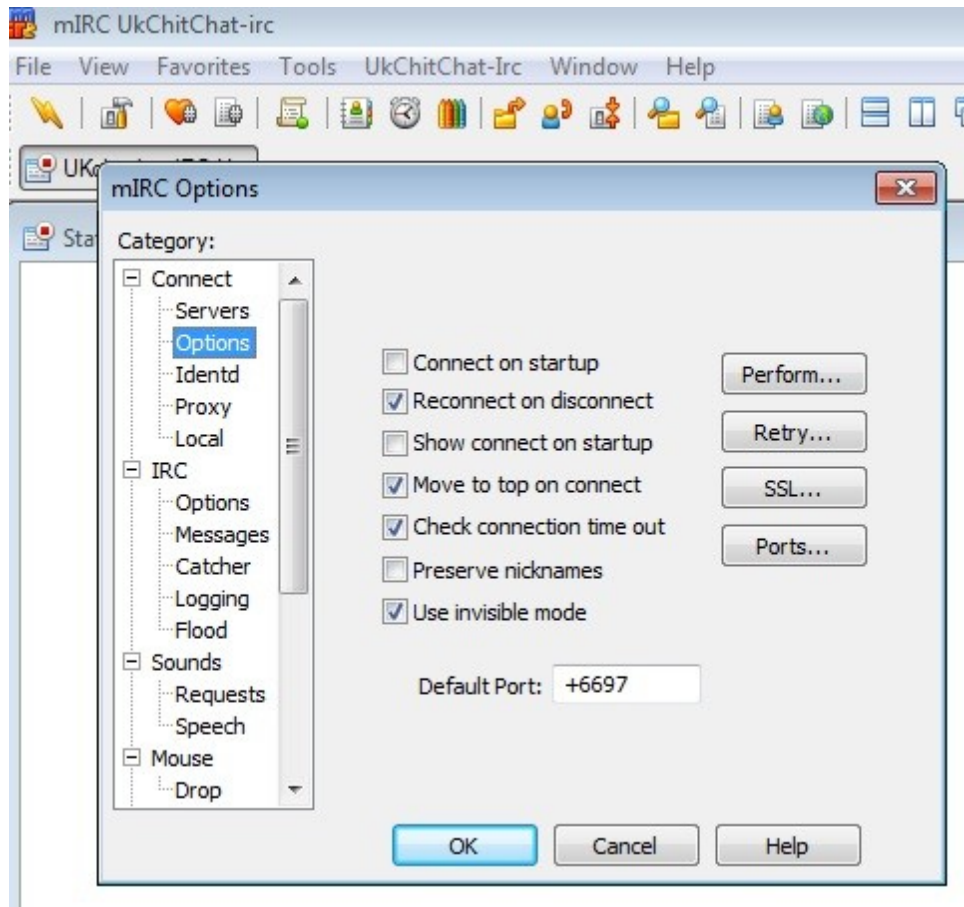

fig.12

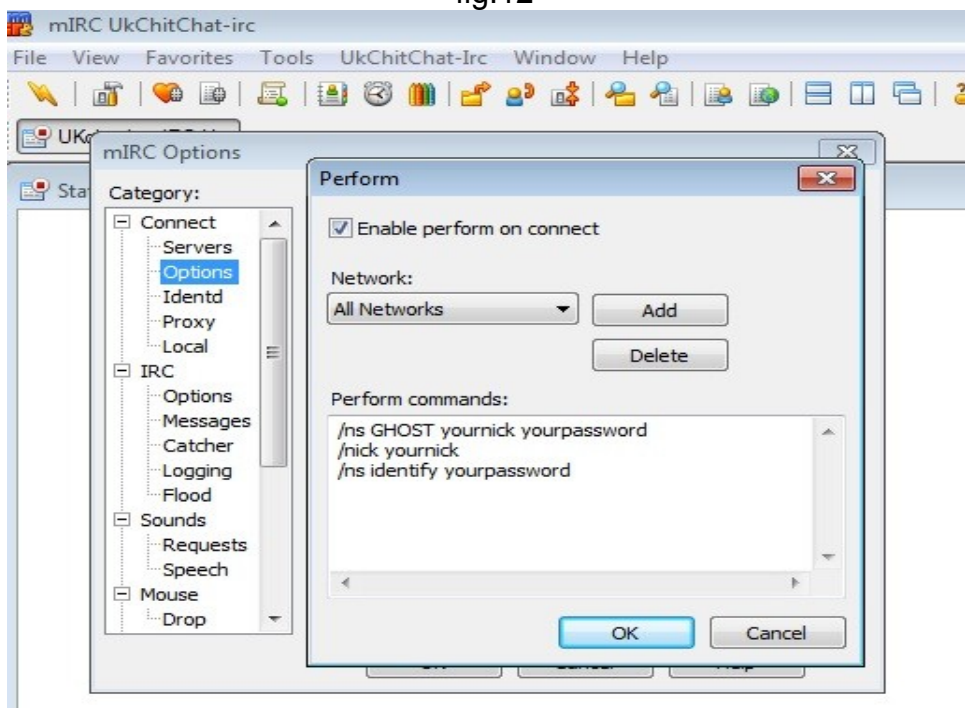

fig.13

Fill in the box as (fig.13) but replace yournick and your password with those you have registered. When done click on ok, and ok again to close the Options dialog. Now you are ready to chat, click on the yellow lightening icon (under file) and you will connect to UKChitChat-irc and join 2 rooms, #Lobby and #wkdfm.

Have fun and if you need any further help, just type /join #help and someone will be there to help you :)
